

FDDT Case Report

Fraud Document Detection Tool — system-assisted analysis for human review. See Section 6 for what this report is and is not.

1. Case Details

Case ID	CASE-DE627FA2 de627fa2-3d99-4340-8b3e-79ad041bb7d4
Submitted by	test1Reviewer L2
Submission date	2026-10-06 15:07 UTC
Documents	1 Types: School document
Case type	Procurement documentation
Status / decision	Pending manual review / Pending review
Report generated	2026-10-06 18:28 UTC by test1Reviewer L2 (Reviewer L2)
Report ID	f6cea708-2b41-486b-b2d3-1a85e300f713

2. Executive Summary

HIGH RISK Score 60 / 100 (computed 2026-10-06 18:28 UTC)

Why: Driven mainly by (40 points): 'case2.pdf': 1 page(s) are near-identical to previously submitted documents. Page 1 matches page 1 of "sample21.pdf" in case CASE-CF609781, submitted by test1Reviewer L2, and the two files are byte-f...

Decision status: Pending review.

Exceptions: 3 item(s) did not pass, 2 of them shown as highlighted regions on the source pages. Section 5 lists each one; Section 9 shows them on the documents.

This summary is deliberately short. The reasons behind the tier are in Section 3, the complete checklist is in Section 4.

3. Explainable Findings

The risk engine is a transparent, weighted rule set. Each row is one rule that fired, with the reason text stored at scoring time. Points are summed (raw 60), capped at 100, and mapped to a tier (medium from 30, high from 60) — here **60/100, high**.

Severity	Points	Check	Document / page	Reason
HIGH	40	Duplicate detection	case2.pdf · page 1	'case2.pdf': 1 page(s) are near-identical to previously submitted documents. Page 1 matches page 1 of "sample21.pdf" in case CASE-CF609781, submitted by test1Reviewer L2, and the two files are byte-for-byte identical (same SHA-256) — the exact same file re-uploaded. Highlights: R2
HIGH	20	Issuer verification	case2.pdf	'case2.pdf': Charges far above the issuer's published fees: Tuition Fees 52,130.00 is 306% above the published 12,840.00 (The Gulf International Private Academy KG2, 2023-24; Bayut school guide listing (third party); third-party listing, not verified). The other charges match their published fees within 2% (Books 650.00, Uniform 300.00) — one inflated item among exact ones is typical of an altered figure.

4. All Checks

The completeness record: every check that ran on every document, including those that passed. Section 3 is the narrative; this is the checklist.

Document 1 — case2.pdf (School document · 6 passed, 3 flagged)

Check	Result	Details
Metadata forensics PDF metadata, edit history and incremental-save markers.	Pass	No anomaly detected by this check.
Font consistency Text set in a different font family from the text around it (text layer, or OCR font recognition on scans).	Pass	No anomaly detected by this check.
Error level analysis (ELA) Pixel-level recompression differences that can indicate edited regions.	Pass	No anomaly detected by this check.
Copy-move detection Regions of a page that were duplicated elsewhere on the same page.	Pass	No anomaly detected by this check.
Visual inconsistency / AI-generation review Model review of fonts, alignment, contrast, sharpness, lighting and signs of AI generation.	Flag	1 finding(s). Page 1 — Text alignment: The signatures at the bottom are misaligned and have different baselines compared to the typed text around them, notably in the Registration Department and Accounts Department areas (approx. bounding box x:0.1, y:0.8, wi...
Signature / stamp detection Whether a signature or stamp mark is present where this kind of document normally carries one.	Pass	3 signature/stamp region(s) located (presence only).
Duplicate detection Perceptual-hash comparison of each page against previously submitted pages.	Flag	1 finding(s). Page 1 matches page 1 of "sample21.pdf" in case CASE-CF609781, submitted by test1Reviewer L2, and the two files are byte-for-byte identical (same SHA-256) — the exact same file re-uploaded.
Field validation Date, subtotal / tax / total and reference-number plausibility.	Pass	6 sub-check(s) passed; none flagged.
Issuer verification Issuer name matched against the issuer registry.	Flag	Issuer matched 'أكاديمية الخليج الدولية الخاصة'. Fee benchmark: Charges far above the issuer's published fees: Tuition Fees 52,130.00 is 306% above the published 12,840.00 (The Gulf International Private Academy KG2, 2023-24; Bayut school guide listing (third...

Linked cases (reviewer note, not scored)

Other cases of this company that share a scanning device, a parent/guardian or a family/student ID with this one. Shared office scanners are common, so this is context for the reviewer only; it does not affect the risk score.

Case	Shared
CASE-37B33CBB	same scanning device (PPS - SFO2-A-MFP01, serial 00206BE9FB63); same parent/guardian ('Mr. Ahmed Salem Abdulla AlKindi' / 'Ahmed Salem Alkindi (father's name in HAMDA AHMED SALEM ALKINDI)')
CASE-6CB8F7E1	same scanning device (PPS - SFO2-A-MFP01, serial 00206BE9FB63); same parent/guardian ('Mr. Ahmed Salem Abdulla AlKindi' / 'Ahmed Salem Alkindi (father's name in HAMDA AHMED SALEM ALKINDI)')
CASE-6CE43E0C	same scanning device (PPS - SFO2-A-MFP01, serial 00206BE9FB63); same parent/guardian ('Mr. Ahmed Salem Abdulla AlKindi' / 'Ahmed Salem Alkindi (father's name in HAMDA AHMED SALEM ALKINDI)')
CASE-942C8493	same scanning device (PPS - SFO2-A-MFP01, serial 00206BE9FB63); same parent/guardian ('Mr. Ahmed Salem Abdulla AlKindi' / 'Ahmed Salem Alkindi (father's name in HAMDA AHMED SALEM ALKINDI)')
CASE-A7705426	same scanning device (PPS - SFO2-A-MFP01, serial 00206BE9FB63); same parent/guardian ('Mr. Ahmed Salem Abdulla AlKindi' / 'Mr. Ahmed Salem Abdulla AlKindi'); same family number (1245)

CASE-CF609781	same scanning device (PPS - SFO2-A-MFP01, serial 00206BE9FB63); same parent/guardian ('Mr. Ahmed Salem Abdulla AlKindi' / 'Mr. Ahmed Salem Abdulla AlKindi'); same family number (1245)
CASE-DB43653A	same scanning device (PPS - SFO2-A-MFP01, serial 00206BE9FB63); same parent/guardian ('Mr. Ahmed Salem Abdulla AlKindi' / 'Ahmed Salem Alkindi (father's name in HAMDA AHMED SALEM ALKINDI)')

5. Exceptions

Everything that did **not** pass, drawn from Section 4 and written as concrete items (3 in total). A region ID (R1, R2, ...) points to the highlight that shows the exception on the source page in Section 9 — click it to jump there.

No.	Exception	Where	Highlight
1	Visual review: text alignment inconsistency (model judgment) Page 1 — Text alignment: The signatures at the bottom are misaligned and have different baselines compared to the typed text around them, notably in the Registration Department and Accounts Department areas (approx. bounding box x:0.1, y:0.8, width:0.4, height:0.15). This is a vision-model judgment, not pixel-level an...	Document 1 (case2.pdf) · page 1	R1
2	Duplicate: page is a near-duplicate of an earlier submission Page 1 matches page 1 of "sample21.pdf" in case CASE-CF609781, submitted by test1Reviewer L2, and the two files are byte-for-byte identical (same SHA-256) — the exact same file re-uploaded.	Document 1 (case2.pdf) · page 1	R2
3	Fee benchmark: Charges far above the issuer's published fees: Tuition Fees 52,130.00 is 306% above the published 12,840.00 (The Gulf International Private Academy KG2, 2023-24; Bayut school guide listing (third party); third-party listing, not verified). The other charges match their published fees within 2% (Books 650.00, Uniform 300.00) — one inflated item among exact ones is typical of an altered figure.	Document 1 (case2.pdf)	—

1 exception(s) show “—” because they have no place on a page (for example a missing field, or a check that did not localize its finding).

6. Limitations and Assumptions

Please read this section before relying on anything in this report.

Limitations of This Analysis

What this report is

This is **system-assisted analysis to support human review**. It is not a certified forensic or legal determination that any document is genuine, forged or fraudulent, and it must not be presented as one.

Three kinds of finding

Deterministic pixel and structure checks — error level analysis, copy-move detection and PDF metadata forensics — are computed by fixed algorithms over the file’s pixels and structure. Localized findings are drawn with **solid** boxes (ELA in red, copy-move in orange). They are signals, not proof: ELA in particular can false-positive on legitimately recompressed scans and can miss print-and-rescan tampering.

Deterministic rule-based field checks — field validation and cross-document consistency — compare extracted values by fixed rules and are drawn with **solid purple** boxes. They are exact about the values they compare, but only as reliable as the OCR and extraction that produced those values.

Model-judgment checks — the visual inconsistency review, the AI-generation assessment and the signature/stamp comparison — are **probabilistic assessments** made by a vision-language model, not deterministic proof. They can vary from run to run, and their boxes are only approximate; they are the **dashed** boxes captioned “approximate” throughout this report. Signature and stamp detection shows presence and placement only and is not an identity match; the AI-generation assessment is experimental, and its accuracy on scanned business documents has not been validated.

What the system can and cannot see

The system evaluates the **submitted document file itself**. It cannot verify facts external to the document — for example whether a real-world transaction actually occurred, whether the named issuer really produced the document, or (without a pre-existing reference signature) who a signatory is. Printed Arabic and English text are read; handwritten Arabic is not reliably read.

Absence of a finding

The absence of a flagged finding does not guarantee that a document is genuine. It means only that no supported check detected an anomaly.

Check coverage on this case

Not every check applies to every document or case. This is what actually ran here:

Check	Status	Coverage on this case
Metadata forensics	Ran	Ran on 1 of 1 document(s); 0 flagged.
Font consistency	Ran	Ran on 1 of 1 document(s); 0 flagged.
Error level analysis (ELA)	Ran	Ran on 1 of 1 document(s); 0 flagged.
Copy-move detection	Ran	Ran on 1 of 1 document(s); 0 flagged.
Visual inconsistency / AI-generation review	Ran	Ran on 1 of 1 document(s); 1 flagged.
Signature / stamp detection	Ran	Ran on 1 of 1 document(s); 0 flagged.
Duplicate detection	Ran	Ran on 1 of 1 document(s); 1 flagged.
Field validation	Ran	Ran on 1 of 1 document(s); 0 flagged.
Issuer verification	Ran	Ran on 1 of 1 document(s); 1 flagged.
Signature comparison (advisory)	Did not run	Did not run — no reference signature was set for this case.
Cross-document consistency	Not applicable	Not applicable — this case has a single document.

Risk score and rule versions

The risk score in this report (**60/100, high**) was computed at 2026-10-06 18:28 UTC (assessment `dee3e835-2d17-475c-90d5-cbc8d3d35baf`) from the risk-rule versions that fired: `duplicate.cross_case_match v1` (weight 40); `issuer.fee_benchmark_deviation v1` (weight 20). Tier thresholds at that time: medium from 30, high from 60.

Rule weights are versioned and are never re-applied retroactively: if an administrator later edits a rule, this case is not re-scored, and **this report remains an accurate historical record** of what was known and weighted when it was generated. A report generated later may legitimately differ.

Assumptions

What the analysis took to be true without independently verifying it. These are specific to what ran on this case.

- The issuer registry (2 active entries) was assumed to be current and accurate as of 2026-10-06 18:28 UTC. An issuer that is absent from it is reported as “not in registry”, which is a prompt to verify the issuer — not a finding that the issuer is fraudulent.
- Field values were read by OCR followed by language-model extraction and are assumed to have been read correctly. Each field carries a confidence and an “uncertain” flag. This build records that flag but does not automatically route low-confidence documents to manual review, so it is listed here for the reviewer instead: no field was marked uncertain on this case.
- The SHA-256 chain of custody shows the stored file is unchanged since upload. It does not show that the uploaded file is the issuer’s original — a document altered before upload is judged on its content, like any other.
- Risk-rule weights, severities and tier thresholds are administrator-configured and assumed to be appropriately calibrated; the score is advisory and is not a probability of fraud.

7. Audit Trail

Chronological case-level events, read from the append-only audit log (times in UTC). This report does not write to or duplicate the log.

8. Appendix

The detailed technical record, for someone auditing the analysis itself rather than a first-pass reviewer.

8.1 Extracted fields

Normalized values as stored at extraction time. “Located” is the page the value was matched to (used for the purple highlights); a blank means no position was recorded. Arabic values are shown right-to-left, numbers left-to-right.

Document 1 — case2.pdf

Field	Value	Confidence	Located
Issuer	THE GULF INTERNATIONAL PRIVATE أكاديمية الخليج الخاصة ACADEMYO	99%	p.1
Reference number	52086	98%	p.1
Date	2023-07-05	99%	p.1
Amount	57,182.50	98%	p.1
Subtotal	Not found	uncertain	
Tax rate	5.00	95%	p.1
Tax amount	42.50	95%	p.1
Trn	100216382000003	99%	p.1
Student name	GHAYA AHMED SALEM ABDULLA ALKINDI	99%	p.1
Grade	KG2	99%	p.1
Bank beneficiary name	The Gulf International Private Academy	98%	p.1
Bank name	Abu Dhabi Commercial Bank (ADCB)	98%	p.1
Bank account number	260337020001	98%	p.1
Bank iban number	AE250030000260337020001	98%	p.1
Bank branch name	Khaleefa Street, Al Ain, Abu Dhabi	98%	p.1
Parent name	Mr. Ahmed Salem Abdulla AlKindi	98%	p.1
Family number	1245	95%	p.1

8.2 Document hashes (chain of custody)

SHA-256 of each original as recorded when it was uploaded to immutable storage, re-checked against the stored file when this report was generated.

Document	SHA-256	Verification
case2.pdf 59,415 bytes	e9c3ea682c7407ba50d8564f90fb668ee106280583b785e4f80ea151456a70b6	VERIFIED

8.3 Technical parameters used by each check

Page rendering (input to ELA, copy-move, duplicate, visual review)

Render resolution	200 DPI
Colour model	RGB, converted to BGR for OpenCV

Metadata forensics

Libraries	pikepdf / PyMuPDF (PDF structure, XMP, incremental updates)
Modified-after-created rule	flagged if ModDate is more than 1 second(s) after CreationDate
Editing-software names matched	photoshop, gimp, illustrator, affinity, coreldraw, paint.net, pixlr, canva, inkscape

Error level analysis (ELA)

JPEG recompression quality	75
Error gain (scale)	50 (sqrt error term; the reference tool's default)
Contrast stretch / LUT	not applied — the raw error magnitude is thresholded directly
Region threshold	page-relative percentile 99.7 with an absolute floor of 60/255
Region area accepted	0.2% – 60% of the page
Applies to	pages with an embedded raster image only (born-digital text pages are exempt)

Copy-move detection

Keypoint algorithm	BRISK (OpenCV), detector threshold 200
Response / matching / distance thresholds	90 / 20 / 15
Minimum cluster size	30 matching keypoint pairs
Minimum region area	2% of the page
Keypoint / match caps	4,000 / 4,000

Duplicate detection

Hash	perceptual hash (imagehash pHash), 64-bit, one per rendered page
Hamming-distance threshold	5 ($\leq$ this is flagged)
Compared against	every page hash of every previously submitted document

Visual inconsistency / AI-generation review

Model	gpt-4.1-mini
Independent runs per page	2
A finding is kept if	both runs report it, or one reports it with high confidence
Image sent to model	page render, long edge $\leq$ 1536px

Signature / stamp detection and comparison

Model	gpt-4.1-mini
Pages analysed per document	first 10
Output	presence and placement only; comparison is a qualitative verdict, never a numeric score

Field validation

Sub-checks	date not in the future; subtotal vs line items; total vs subtotal + tax; reference-number format
Amount tolerance	1% of the amount, minimum 0.01

Issuer verification

Matching	rapidfuzz weighted ratio against the active issuer registry, with a model-judged fallback for cross-script names
Similarity threshold	85

Field locations (purple highlights)

Method	extracted values matched back onto OCR word positions (Azure Document Intelligence Layout)
Repeated values	resolved by nearby keywords (“total”, “subtotal”, “VAT”, “date”...)
Accuracy	approximate; a field that cannot be matched is reported without a highlight

9. PDF Highlighted Regions

Every flagged page, rendered from the original with its findings drawn in. These are copies made for this report; the original files are untouched. Only pages with at least one highlight appear. Each highlight has a region ID that Section 5 refers back to.

Colour key

	ELA (solid red)
	Copy-move (solid orange)
	Font mismatch in the text layer (solid fuchsia)
	Field exception (solid purple)
	Model judgment (dashed blue, approximate)
	Page-level finding (not localized)

Region index

Region	Document	Page	What it shows
R1	Document 1 (case2.pdf)	1	Visual review — text alignment (approximate)
R2	Document 1 (case2.pdf)	1	Duplicate detection — near-duplicate page

case2.pdf — page 1

Section 9 · Document 1 of 1 · regions R1, R2

 Model judgment (dashed blue, approximate)  Page-level finding (not localized)
